### Full \$3.00 Treatment—FREE

I want every Consumptive in America to Telegraph or write
TO-DAY.

If hundreds affilicted with every malignant form of consumption have already been cured by Kalamazoo's wonderful discovery, the Copper Cure, won't you try it? If you have a persistent cough, bronchlits, catarrh, or any throat or lung trouble, you are in danger. Telegraph or write me to-day. Now! Don't lose a precious moment. I will send you the treatment free immediately and check the dread disease.

This is not a sample, but a 2.00 treatment, sent absolutely free to show you by actual results that you can be cured in your own home at little cost.

O. K. Buckhout. American Member National Association for Prevention of Consumption, of which the Prince of Wales is President and Edward VII patron.

Antidotum Tuberculose will cure any case where death is not already at the door, and will always prolong life and bring comfort. My treatment, while powerful in its action in destroying tubercle bacilli, is mild and harmless to the individual, being a wonderful reconstructor of tissues, which speedily brings health and vigor. Hundreds of cured consumptives, including many who had considered themselves hopeless, have written me grateful letters of indorsement for Antidotum Tuberculose. I want you to try it. Show this advertisement to your friends. I want everybody to know that a cure has at last been found. Telegraph or write me today. My 42-page book is full of valuable information for consumptives—also sent free. O. K. Buckhout, F 1 Bennett Bldg., Kalamazoo, Mich.

A New Cure For

3 Remedies Free.

Formula B, to replenish vital substance, revitalize the brain, spine and sexual structures by furnishing the true vital elements of vigorous manhood. A bettle of Formula A, to reconstruct the nervous and general system, to restore natural strength, manly vigor and vital power without stimulation. These three new preparations cure and restore all men—whether old, young or middle-aged—who suffer from any form of nervous and sexual weakness, resulting from overwork, physical decay, excesses, the practice of secret vice or otherwise. You can write with perfect confidence and without fear of being humbugged by a "Prescription, C. O. D.," or any other frand. Just tell us where to send them, and that you wish to be continued of a cure without puning uson cent and the three large free bottles will be forwarded to you in a plain, sealed box, without any marks to identify its contents or where it came from. This is the most exhaustive and complete free test course ever offered nervous and weakened men. That it is absolutely successful in all cases is proven by the fact that we ask every man to give it a thorough test, at his own home, and be his own judge, without paying us one cent. There will be no interference with your work and daily habits, and strict confidence regarding names, correspondence, etc., is assured. Address, IAMES & JAMES. & James Bidg., Covington, Ky,

training in institutional dietics are constantly being received by Miss Florence Corbett, dietitian in charge of the institutions controlled by the Department of

Domestic science teachers in all parts of the country are anxious to avail them-selves of the opportunity to prepare for taking charge of the food supply of in-

inder the Department of Charities, so far

stitution and manage its dictary department with trained rather than experimental skill.

"There is no other place that I know of where this training can be obtained. No school can possibly give it and no experience except that gained in an institution.

"When a pupil of domestic science happens to find such a position where those in charge are willing to put up with her inexperience she experiments until she has learned how to manage.

"No school can duplicate institutional conditions; no school can be equipped on as large a scale, and no school gives experience in handling workers.

"A school can really give only the study of such equipment, illustrated in the most limited way. When a dietitian finds herself face to face with the problem of providing the proper food for 1,000 persons in the best way, she finds herself confronted by an entirely new proposition.

WHAT THEY LEARN.

"In the course of training that we provide a dietitian receives just this experience. She is placed under the resident physician at the City, Metropolitan or Randall's Island Hospital. Here she has to direct the purchase, preparation and serving of large amounts of food. She has to meet both the officers of the institution and the help, and be tactful to both.

"It is no easy matter to direct the help."

tution and the help, and be tactful to both.

"It is no easy matter to direct the help so as to keep them in their position a long time, which is what must be done, for good help is hard to get.

"The first duty of a pupil dietitian is to take charge of the special diet kitchen.

"All foods for the various kinds of illness are prepared here, and considerable administrative ability is required to serve them all at the proper time and in the proper place."

looms are used entirely on plush for the cars.

"The Sanford mills have sixty looms turning out this one class of goods, and the Lowell mills are giving almost their entire attention to this line. Short length hair, which formerly was sorted out as ultimate waste, is now in so much demand for zibelines that it commands a price equal to that of longer fleece."

### THRILLING RACE WITH MOOSE

Maine Man, Mounted, Tries to Run Animal Down, but Fails.

Bangor, Me., Oct. 81,-Ernest G. Judkins, bookkeeper for the Kineo Company, had a remarkable experience with a bull moose on the carriage road to Deer Head Farm two mils from Kineo.

Mr. Judkins was taking a morning ride, galloping along a level stretch, when the horse came to a standstill with a jolt and

Looking ahead, Mr. Judkins saw a buil moose. feeding on the tender sprouts of the bushes growing by the roadside, not sixty yards away.

Mr. Judkins's first impulse was to ride the moose down, but he thought better of this, and hooted to attract the animal's attention, and possibly to frighten him from the road so that he could proceed, but the moose fed calmiy on.

At the end of a few minutes the beast moved down the road in search of more food, and Mr. Judkins followed at a respectful distance, hooting until his throat

## Styles for Young Men Out of our large and varied stock of Young Men's Apparel, made up for us by the best tailors in the country, who devote their genius to designing and creating

Youths' Clothes exclusively, we hold up for consideration a most remarkable value in two styles of unusual popularity---the Belt Overcoat and Double-Breasted Suit.

The Overcoat The long, loose-fitting Overcoat, with belt, as shown in the illustration, has won favor with a large class of stylish dressers among young men and is certain to hold it. We are showing the Belt Coats in various qualities up to \$25—we want you particularly to see those at \$14.75. They come in fine Scotch fabrics, of brown and gray color mixtures, and in black and Oxfords. Some are lined complete with serge, some half satin, and serge or fancy wool cloth. They are made with broad shoulders and small, close-fitting collar of silk velvet. In all sizes from 15 to 20 years.

The Suit The three-button Double-Breasted Style is all the go with young men and the values we are giving increase the demand. At \$14.75 we offer fine Black Thibets, Unfinished Worsteds and a big assortment of fancy Scotch fabrics, lined with all wool serge, hand-tailored throughout, with the athletic shoulders and small, smooth collar, having a rather long roll. There's style and a quality in these not obtain-

or Money Back.

Your Money's Worth

made for the impudent highwayman, pell mell.

With the first leap of the horse the indifference of the moose changed to concern, and, turning abruptly about, he started down the road at a great, clumsy trot. This put a new and interesting phase to the situation, and, urging on his horse. Mr. Judkins proceeded to have his turn at the sport, only hoping that the moose would keep to the road. The moose would keep to the road. The moose would keep to the road. The moose obliged in this particular and the horse was a good one and entered into the spirit of the chase. But try as he could, the distance between him and the feeing animal did not lessen materially.

"I never saw anything like it." said Mr. Devante discovering the cause of the accident. If was presumed that one of them had stepped on a loaded cartridge, which has exploided, sending the bullet into Mr. Everhart's hand, but no trace of a empty shell could be found.

A clagar, perhaps two-thirds of it burne away, which the injured man was hold ing in his hand at the time of the my terious shot, was found, the burned end owhich was so peculiarly hollowed as 'the cigar was loaded and responsible for the cigar was loaded and responsible for the cigar was loaded and responsible for the accident.

street an explosion occurred and Mr. Everhart called out to his friend: "Captain, I am shot."

C. Devane of Hibbing, a Great Northern engineer, was not more than ten feet behind the injured man when the accident occurred. He heard the explosion and immediately went to his assistance, reaching him at about the same time that his friend did. He was escorted to the office of Doctor H. J. O'Brien and taken from there to the Leslie Hospital, where the end of his finger and thumb were amputated.

Officer Williams and Mr. Devane made a thorough search of the locality without discovering the cause of the accident, It was presumed that one of them had stepped on a loaded cartridge, which had exploded, sending the bullet into Mr. Everhart's hand, but no trace of an empty shell could be found.

A cigar, perhaps two-thirds of it burned away, which the injured man was holding in his hand at the time of the mysterious shot, was found, the burned end of which was so peculiarly hollowed as to lead the officer and others to believe that the cigar was loaded and responsible for the accident.

SPECIAL BY CABLE TO THE NEW YORK HERALD AND THE ST. LOUIS REPUBLIC London, Oct. 31 .- (Copyright, 1903.)-Lady Lonsdale, who has just returned with the Earl from a year's tour around the world, has had something interesting to say to an interviewer regarding her visit to the United States, chiefly referring to Anglo-

American marriages,
"There are," she said, "few international marriages between English women and American men, simply because English girls will not have American men." Then, speaking of the "busier and more natural she said that the English woman has ber court duties of official entertaining and her general social duties as well. Above all, the care of the people on her husband's estates is enough to fill her life with interesting and useful work.

FROM CALF OF THE LEG TO ANKLE

A SOLID SORE.

New Castle, Pa., July 29, 1903.

New Castle, Pa., July 29, 1903.

Three years ago a common boil appeared on the calf of my limb. Not yielding to simple home remedies, I consulted a physician, who prescribed a poultice, flax seed, supposedly. By some fearful mistake I was given corrosive sublimate, and after having it on for a few minutes I could endure the pain no longer, so took off the application and found that my limb from the calf to the ankle was in an awful condition. I immediately sont for another physician, who told me I had been poisoned. My limb from the calf to the ankle was one solid infiamed sore. I was advised to begin S. S. S., and improved rapidly under its use, but about this time I had an attack of typhoid fover, and this settled in the original sore. This, of course, caused a back set, but having confidence in the ability of S. S. S., I began it again as soon as I was over the fever, and to make a long story short, was completely and permanently cured. Two years have elapsed, and I have never had a return of the trouble. MPS. CHARLES CAMPBELL,
Broadway Hotel Denver, Colo.

Charles Campbell has appeared before me,
a notary, this 7th day of October, A. D.
1903, and swore to the foregoing.

WILL M. DESCH,
Notary Public.

My commission expires Dec. 6, 1904.

Every day, through the medium of advertisements inserted in the daily press. Weak Men are informed that some man has a cure for them—a remedy which will restore their Vigor and Vitality and all the Ardor and Strength of Youth. But men who have lost or weakened their Physical Power and whose Vital Strength is not equal to the requirements of the duties of life know that these advertisements—many of them, at least—are glaringly misleading. Now, if you are a man whose Youthful Fire is burning low—and especially if weak at a time of life when you should be in your prime of vital strength—you know as well as I do that you would pay out gladly any amount of money you had to, or would almost work year in and year out for the man who could and would restore you to that standard of manhood which is the birth-right of every man; but you also know that you can put very little, if any, confidence in the mere statement that "some one has a cure." for perhaps you have tried and tried, have squandered your money and uselessly drugged yourself without any beneficial results. Perhaps you almost despair of ever becoming cured. Perhaps you are "just a little weak" and have never tried anything. Be this as it may, if you are not as strong as you should be, from whatsoever cause, I am interested in me and my treatment, for I have in the Sir John Hampton Vital Restorative a positive and certain cure for you—no guesswork, no patchwork, but just the kind of a cure

Anothy for many years, and having expended many hundreds of dollars on operations and advertised "curea" through the many hundreds of dollars on operations and advertised "curea" through the hundreds of friends I was persuaded to he had been companied to the companied of the English Restorative and I and of the English Restorative and I and the foreign that the perfect cure and that I have now been cured over a year, and, therefore, known may recovery is permanent. I advise all men who are in the condition that I was in to take this treatment. I advise all men who are in the condition that I was in to take this treatment. I advise all men who are in the condition that I was in to take this treatment. I advise all men who are in the condition that I was in to take this treatment. I advise all men who are in the condition that I was in to take this treatment. For they are frauds.

New York, Oct. 31.-Raw wool merchants are much interested in the efforts of the Government Bureau of Animal Industry to promote the raising of Angora goats in New England and other parts of the coun-

One of the largest wool commission dealers in New York, in discussing Mr. Thompson's propaganda, said:

"At present prices of mohair and with the present demand for the product, it would be profitable for farmers to raise more goats.

"Yet, if a large number of farmers should engage in the business it might be overdone. Moreover, the fashions, which now call for mohair, might change, and this would reduce the demand. There are a number of things to be considered before encouraging a farmer to raise goats.

USED IN UPHOLSTERING.

"Most of the mohair goes into upholstering and is used largely in railroad cars. In the last year or two mohair has been called for extensively in alpaca and China

camel's hair cloth.

"The mohair, because of its brilliant and glossy appearance, has come greatly into favor for mixing in all kinds of dress goods for ladies. The mohair gives the luster which is so much admired.

"The amount of goat's clip in the West is now three or four times what it was five years ago. The price is now 5 to 10 per cent lower than in the spring. The chief sources of our supply now are Turkey and its tributary lands and the Cape of Good Hope.

"Palestine is still prolific in goats. In a trip 1 made through the Holy Land I watched with interest the goats and the sheep running together, as mentioned in the Bible. There is economy in this, as one shepherd can care for the two kinds of animals.

"There is a shrinkage of about 40 per

some spiendid clips raised in this country. With care and scientific attention given to the goats our farmers could probably improve the clip so as to make it equal in quality to what we buy abroad.

"Suppose that we raise 3,00,000 or 4,000,000 pounds more goat's hair than at present.

prove the clip so as to make it equal in quality to what we buy abroad.

"Suppose that we raise 3,000,000 or 4,000,000 pounds more goat's hair than at present.

"That additional supply would cut in on the trade from Turkey and the Cape. Then the question comea up. if the American supply is increased will the price of the foreign clip be reduced in the price of the foreign clip be reduced in the price of retaining this market? Foreign sellers might lower the level of prices so that our farmers would not make the profits that they expect.

"The American farmers would have the advantage of nearness to the factories and correspondingly lower freight rates." Mr. Thompson recently visited the mohair mills at S--"ord, Me. He learned that the goats which furnished the hair were raised mostly in the West.

Then he advised the New England farmers that the goats could be reared just as well in the vicinity of the mills. The head of the Sanford mills had just returned from Constantinople, where he bought 250,000 pounds of raw mohair for use next winter, and he expressed to Mr. Thompson the hope that before many years American mohair manufacturers may buy in their own country all the goat hair that they need.

SHEAR FOUR POUNDS ANNUALLY.
Mr. Thompson said in an address at Boston a few days ago:

"The average goat will shear about four pounds of mohair a year. This will bring at present prices 32 cents a pound. Some goats will produce ten or twelve pounds of hair, and superior qualities of hair bring 45 cents a pound.

"There are goats that do not produce more than a pound of hair, and of a quality so poor that it will not sell above 18 cents. There is a small quantity of mohair of the finest grade that brings from \$1 to \$3 a pound. All depends on the standard of the flock.

"In the 1,000,000 pounds handled by the Sanford mills last year not more than 50 pounds of the \$1 quality were found, and the extra price id not pay for the sorting. In general the fleece of a good goat fetches about the same price as the fleece of a goo

sive. There is danger, too, of these are good for external use, but they can't stop the discharge or change

the condition of the blood, and for this reason the sore never heals permanently. Not until the blood is purged of impurities and the system cleansed of all harmful substances should the ulcer heal, or the effect upon the system might prove disastrous. S.S.S. goes into the circulation and searches

> old sore and invigorates and builds up the polluted, sluggish blood again, and as the poisonous matter is driven from the system the sore begins to heal, new flesh forms and the place is soon covered over with fresh skin and the sore is gone for all time. Where the constitution is debilitated from the effects of chronic sores, ulcers, abscesses, carbuncles,

boils or other severe skin eruptions, S. S. S. will build it up again and stimulate and strengthen all parts of the system. S. S. S. contains no strong minerals, but is guaranteed entirely vegetable. It is unequaled as a Blood Purifier and invigorating tonic. Do not depend upon local remedies alone. Get your blood right, and as it forces out

the poison the sore must heal, because nothing is left in the system for it to feed upon. Write us should you desire medical advice, which is given THE SWIFT SPECIFIC CO., ATLANTA. GA.

OF BAD BLOOD

OLD SORES, ULCERS, ABSCESSES

the system, is an old festering sore, running ulcer, or abscess. They show

the bodily impurities are not passing out through the proper channels, but

are left in the system to clog and poison the blood. So thoroughly does the poison permeate the system that every little scratch, cut or bruise

inflames and lesters. Everything about an old sore or ulcer suggests disease.

The best evidence of a bad condition of the blood and unhealthy state of
